Vet Life Script

- **WORD FOR WORD script and requirements to sell 30k/mo.**
- **500 dials a day. 6-8 presentations.**
- **Dial every lead 3 times back to back.**
- **Pace: Slow and controlled, make sure to pause and let them speak (not too much).**
- **Tonality: $10/hr medical underwriter, ASSERTIVE! Never ask, TELL! Genuinely care about making their situation better. Not if you make a sale.**
- **Read this WORD FOR WORD.**
- **Triple AAA: Agree, ask and attack with all the objection handles on the script.**
- **Understand that if you can't help a man that needs coverage, that financial burden that is left onto his sweet wife and she has to destroy her credit is on YOU!!!**
- **Doctor / Patient relationship.**
- **Quick and concise: Don't yap, don't let them yap. They buy from professionals, not friends.**
- **Smoothly transition from one part of the script to another.**
- **Don't sell on approval, sell on the value and why.**

INTRO

- BE ASSUMPTIVE
- BE CONFIDENT
- TALK LOUD

Hey **(Client Name)**, can you hear me okay?

This is **(Your Name)** — I'm the underwriter assigned to the **veterans life insurance request you filled out.**

(AGED LEADS)

Hey (Client), **Can you hear me okay?** — This is (name). I was the underwriter assigned to the **veterans life insurance request you filled out a little while back.**

I have you listed as a **veteran in (state)**, correct?

(Pause)

And I've got your **age / DOB as ___**, is that still accurate?

(Pause)

Perfect.

When you filled that out were you mainly looking to **cover funeral expenses**, or was it more about **leaving money behind for family?**

Phase I: *Intro Objections*

1. **"I'm not interested!"**

No worries at all. Just so I can update the file and take you off the list, did you already get something in place for funeral expenses or not yet?

Then go back to the script…
(If they have coverage:) read next objection

2. ***"I already have coverage in place"***

***Perfect, that actually makes my job a whole lot easier*.. Did you get that in place recently in the last 5 years or have you had it for awhile? Did you get that covered through the VA or a private sector? Just to make sure your veteran discount has been applied.. How much are you covered for? Perfect, roughly how much is your monthly premium?**
IF RECENTLY: So when you sent this in, were you looking to lower your cost by applying your Veteran discounts or increase coverage? *Then go back to the script…*

IF AWHILE (5+ years): Perfect, now since you have had that in place for awhile for it to take care of your funeral expenses.. When you sent this in, were you just looking to leave a legacy behind for your loved ones or was it a specific debt you were trying to cover?
Then go back to the script…

3. **"You are the 10th person that has called me!"**

Oh wow, someone else called you? Why weren't they able to help you out, was it a price issue or a coverage issue? (doesn't matter what they say) *The reason I ask is this is the program for Veterans on a fixed income, and usually our options are way more affordable than that, you're on a fixed income right? So what we'll do is…* ***(go back into script)***

4. "**TAKE ME OFF YOUR CALL LIST" ****PISS BOAT****

Perfect (sir/ma'am), that's exactly what I am trying to do… I am actually the manager here trying to close out your file, I'm sure you've been getting a TON of calls haven't you? (get them

on your side). So just so I can close things out, what was the main concern here? Have you been having trouble finding the right price or is it more the coverage?

4. "**Are you with the VA?"**
   Obviously sir/mam, the VA isnt a life insurance company, im just a medical underwriter here that been contracted out to help out veterans like yourself and make sure you and your family are in the best position possible, we work with every carrier in the nation, im sure … (proceed back to script and end with a question)

5. **I don't remember filling this out!"**

No worries, it does take us about a few weeks to get to your file and I am just your medical underwriter that was assigned to your file today. You put your date of birth as ___ correct? Now, most people's main concern when they fill this out is to make sure that their final expense doesn't fall a burden on their loved ones or leave some extra money behind. Do you currently have anything in place?" ***Then go back to the script…***

"This is not a good time or I'm busy!"

(client name), ***perfect*** we are really backed up to! I'll make this quick for you. You put your date of birth as ___ correct? ***Then go back to the script…***

For Agent: ***Only if they are driving or at work don't proceed the call.. Ask for the best time to reach them. Ask if they were wanting to focus on burial or cremation before ending the call.***

Link: **VETERANS: "When I pass away, the VA will take care of my burial. AKA Veterans think they are getting buried for free."**
I completely understand, but that's actually a common misconception that veterans get buried for free. I wish that was the case.. If it was up to me all veterans should get put to rest at no cost! But unfortunately, too many veterans actually don't know what the VA covers for them when they pass away. The VA just covers your plot and tombstone but your loved ones would be responsible for your burial/cremation. That being said, god forbid something happened to you today, who would be responsible for the funeral expenses and picking up all the pieces tomorrow?
Then go back to the script…

https://www.benefits.va.gov/compensation/claims-special-burial.asp

6. **“Looking for benefits, disability, etc!”**

Perfect, that’s handled by another department, so I’ll pass your info along and they’ll reach out.. This is specifically to help veterans access discounted life insurance plans.. to help cover funeral costs so that burden doesn’t fall on loved ones.… Did you have anything in place to help cover this god forbid you passed away today? ***Then go back to the script…***

“Can you send it in the mail?”

“That’s exactly the purpose of this conversation sir! There’s about 30 options so we just want to make sure we find the best plan for you and your family and secure the best one for you and get the policy shipped out to you, does that make sense?” So what we’ll do is spend a quick minute…

“I just wanna see the numbers, how much is it”

- “That's the whole point of this conversation, there are about 30 different options, and it's not one size fits all, so my job is to just find you the lowest possible rate out of the options that will put your family in the best situation possible.. So what well do” (proceed into client suitability sheet)

“I’ll give you a call back”

-”I don't answer the phone normally since I'm always in appointments, let's get you put down on the schedule… Do you prefer morning or afternoon? Morning? Okay, it's gonna be a tight fit.. Either 9:15 or 10:45 which one works best for you? I’m gonna be calling you back from this number. You know how to save contacts in your phone, right? Perfect, go ahead and save my phone number while we're on the phone so we don't forget. Again my name is (name). (oh you don't know how to save contacts in your phone, go ahead grab a pen and paper for me)

For Agent: ***Only if they are driving or at work don’t proceed the call.. Ask for the best time to reach them. Ask if they were wanting to focus on burial or cremation before ending the call.***

CREDENTIALS:

Just so you know who you're speaking with — my name is **(Full Name)** and I'm a **licensed underwriter here in (state).** That just means I work with all 42 **A-rated carriers in the country**, and my job is simply to help you find the **right amount of coverage for the lowest monthly payment with the veteran discounts.** Some of the companies you may recognize are like **Mutual of Omaha, Transamerica, and Aetna.**

I'm going to **text you a picture of my driver's license / business card real quick** so you have my information. The reason I do that is because I know how it is talking to people on the phone nowadays. Is this a good number to receive texts on?

Perfect — you should see it come through from my **cell phone beginning in (XXX).**

On that card you'll see my **NPN Number,** which you can use to verify that I'm licensed in the state of **(state).**

If you ever want to verify it you can look it up on (state)'s Department of Insurance website.

Let me know when you see that.

Pause

Perfect.

Do you currently have any life insurance in place right now?

BUILD THE WHY:

Now god forbid, when you pass away who will be the beneficiary responsible for paying for the funeral expenses & picking up all the pieces tomorrow?

- What is their name? Ok, is that your **(assume relationship)?**
- **IF HUSBAND / WIFE:** How long have y'all been together?

○ Dang! That's quite some time… you got any advice for a young guy/girl like me? ○
Haha okay I'll keep that in mind.

- **IF HUSBAND / WIFE:** So since you guys have been together for a little while, would it be

better to have them on the phone call with the two of us, or do you handle everything for the family?

- Is **(beneficiary)** in a good financial position to cover a funeral expense or is that why you were looking into this?

So if you passed away yesterday, what would that look like for **(beneficiary)** would they have savings set aside or would it be pretty difficult financially?

Have you thought about whether you wanted to be buried or cremated?

Do you know how much that costs nowadays?!

- **Cremation**: depending on the Fanciness and elegance with the service, urn, and memorial is anywhere from 5-10k
- **Burial** is anywhere from 10-15k depending on the fanciness.

1. So if you passed away yesterday, what would that look like for (Beneficiary Name) would they have to set up a GoFundMe, pass the hat around the church or what would (Beneficiary Name) do?

2. Do you have anything currently in place like a life insurance policy or a significant savings that would help offset the cost of that funeral expense?

3. Why is getting this coverage in place more important to you now compared to the past.. have you had any recent medical issues or a loved one pass recently, or just getting older?

(IF LEAVING EXTRA MONEY BEHIND)
Now, for the additional money you're looking to leave behind sir, is that also for (beneficiary) or someone else?

- Is that for any debt or loans that you want to take care of?
- And If I may ask sir, if something were to happen to you, would (**Beneficiary)** be able to keep up with all the payments and everything or would that be pretty tough on them?(income replacement) ****if a spouse dies, the other loses the lowest of the two social security checks****

IDENTITY FRAME:

You know I like talking with people like you, who are actually selfless enough to make sure that everything is taken care of for their loved ones instead of just doing the bare minimum...
And I'm just curious how come that is so important to you?

Client Suitability Sheet -

So **(client name)** the way this works is a pretty simple process. I'm just going to go over a few questions here on your health which is part of the MIB report. That stands for the MEDICAL INFORMATION BUREAU. From there, we'll look at a few plans that take care of your goals, obviously that's within the budget, because there is no sense of having coverage if you can't afford it.
Once we find a plan that fits the budget and protects (Beneficiary Name), we'll send in an application, figure out when and how you will pay for the policy, and if you're approved, you'll receive the policy packet in the mail in 10-14 business days. Does that make sense?

Income:

1. Now are you currently working, retired or disabled?
   IF retired: *I can't wait to say that one day!*
   IF disabled: *Bless your heart!*
2. As a rough ballpark figure, how much are you bringing in each month?
3. After all your bills are paid for each month, how much is typically left over on average that you're saving up?
4. My job isn't to add another bill, it's just to make sure whatever you choose fits comfortably within your budget so that we ensure that (beneficiary) is protected.

For Agent- Little to No Income left over! ($200 or under)
I completely understand, so that being said, what would be an amount that you would be comfortable allocating into something like this every month to protect your loved ones? $40-60, $60-80? *you want to get a tie down here on what's comfortable for them, don't move on until you do*

For Agent- Income Objection: *Why do you need to know that?*
Well (client name), there are guidelines I have to abide by in regards to making sure whichever option you choose is gonna be affordable for you based on your income. Sometimes our hearts are bigger than our budgets. Don't worry, I'm here to help you not hurt you! (chuckle)

DISCOUNTS: Some carriers offer additional discounts for veterans depending on smoking status and payment method.

1. *Are you a smoker or a nonsmoker?*
   - If smoker: Do you plan on quitting anytime soon over the next couple years? *Absolutely*. Yes- **AMERICO.**

***Nonsmoker*- Perfect, you qualify for that discount!**

2. These life insurance carriers are partnered with certain banks where you can get an additional discount. What's the name of the bank you use so I can look it up? What state did you open that account in?

Great, you're getting both discounts.

<u>Now a little bit on your health…</u> *(circle and write down year)*

Do you mainly go to the VA or a civilian doctor?

1. Any heart attacks, heart failure, strokes, TIA, or stents in the last 5 years?

- **If yes:** *Any Blood thinners:* ***Plavix*** ***or*** ***warfarin?***
- **If yes:** *Any Heart Medications:* ***Nitrostat, nitroglycerin, eliquis?***

2. Any cancer? What kind? How long have you been in remission? *(that means cancer free)*
3. Any diabetes? **If yes:** *Are you on* ***metformin*** *or* ***insulin****?*
4. Any neuropathy? **If yes:** *are you taking* ***gabapentin****?*
5. Any high blood pressure? **If yes:** *are you taking* ***lisinopril****,* ***metoprolol****, or* ***amlodipine****?*
6. Any breathing complications, or COPD? **If yes:** *Are you taking* ***oxygen or inhaler****?*
7. Any anxiety or depression? **If yes:** *Are you taking* ***prozac*** *or* ***seroquel****?*
8. Any Kidney or liver problems? **If yes to kidney:** *Any kidney failure/disorder or dialysis?*
9. Any autoimmune diseases or mental health disorders?
10. Then one last thing.. a rough height and weight for you?

I'm going to go over a few important benefits of the policy that is designed for Veterans and their family, so go ahead and grab a pen and paper so you can write these down.

Write down **Immediate Coverage**: That means once your first payment is made, the coverage starts day one — there's no 2-year waiting period like many policies have. So if something unexpected happened tomorrow, (Beneficiary Name) would receive the full benefit amount tax-free. Does that make sense?

Write down **Locked-In Premium**: This means your monthly payment never increases, and your coverage never decreases. That's why it's important to lock this in while you're still healthy, because once it's in place, it's locked in for life.

Write down **Tax-Free Payout**: When the policy pays out, the money goes directly to (Beneficiary Name) tax-free, so they can use 100% of the benefit toward funeral costs or anything else they may need.

Write down **Living Benefits**: This one is important. If you were ever diagnosed with a terminal illness, the policy allows you to access up to 50% of the benefit while you're still living, completely tax-free.

Lastly, write down **Permanent Coverage**: This is a whole life policy, which means it never expires as long as the payments are made. Whether you live to 90, 100, or even 120, the policy is guaranteed to pay out to (Beneficiary Name).

Quote (Low to HIGH)

Insurance Tool Kits:
https://app.insurancetoolkits.com/fex/lite?token=TFZqRcX2rXWeu-3qAModUSj-33LYf-c_yl5PXc1i

REBUILD THE WHY

So walk me through what exactly would happen if something did happen tomorrow and we didn't do something today, what result would that give you for your family?

Give me a second while I scan through all these carriers.

Based on what you told me, the system built three coverage options for you and you can decide on which option makes the most sense but keep in mind we can adjust as you please.The goal here is just to find the right amount of protection at a monthly payment that's comfortable for you. Go ahead and write down ***FULL MILITARY COVERAGE***, under that write down ***STANDARD FAMILY PROTECTION***, and lastly write down ***ESSENTIAL COVERAGE***

FULL MILITARY COVERAGE: makes sure the entire funeral is covered and leaves money behind for (Beneficiary Name). That would be $(coverage) for $(premium)/month with your discounts applied.

(Pause)

STANDARD FAMILY PROTECTION: is actually the one most families choose. It covers the funeral and also factors in inflation, so (Beneficiary Name) doesn't have to worry about any of those expenses later. That would be $(coverage) for $(premium)/month with your discounts applied.

(Pause)

ESSENTIAL COVERAGE handles basic funeral expenses, but it doesn't leave additional money behind. That would be $(coverage) for $(premium)/month with your discounts applied.

(Pause)

Now, I can look above the first if you want to leave behind more, BUT OUT OF THOSE THREE OPTIONS SIR, which one do you want to try and apply for ?

Phase II: Numbers Objections

1. **"Can you send it in the mail"**

Yeah absolutely sir, that's the whole purpose of this phone call, to secure the approval for your family for the lowest possible rate, and get that policy shipped out to you in 7-12 business days. After the approval is secured you'll also be receiving an electronic copy 24 hours after it is generated in the meantime before the physical copy arrives in the mail.. Does that make sense?

1. **"I'm just shopping around today!"**

***I completely understand,* I'm the same exact way, I want to make sure I'm not paying more than I need to for anything. Now the good news is…With the veterans program they do the shopping for you with all 26 partnered carriers in the country to get you the lowest rate. But Of course our goal today is to make sure you can get approved for it. Does that make sense?**

1. **"I need to think about it!"**

***I completely understand that you do need to think about it sir, at the end of the day the carrier has to think about it as well; it's definitely not an overnight decision.* Just so I have the proper information pulled up for the next time that we do speak, When you do think about it, is it just about which option to go with, or whether to get the coverage at all?**

Whether to get the coverage at all or they say both: got it, Correct me if I'm wrong sir, you did say that it would be tough on her to cover that expense by herself correct? Got it, and correct me if I'm wrong sir, you did say you didn't want to leave her with that to have to tap into the savings, or take out a credit card loan for the expense correct? Got it, so it really sounds like it's just more so about which option to go with, correct? Got it, so …(if which option)

If which one (READ THIS SUPER SLOW)

Do you mind if I make a professional recommendation? What most veterans do in this situation sir, is they start with the lowest of the 3 options as a comfortable starting point, so we can accomplish 3 things here. 1. We lock in today's rate while you still are as young and as healthy as you are gonna be, that way god forbid you pick up a few prescriptions in the near future, or you have a health issue occur, your rate will be protected 2. We can secure the approval of the coverage and you'll be sent the policy in the mail in about 7-12 business days which you can then have something tangible in your hand to look over with your wife, and make the educated decision on whether you should keep the coverage at the minimum or increase it to a higher package over the next few months for the rate that you locked it in at today. And 3rd. At least you'll have SOMETHING in place in the short term, that way (BENEFICIARY) isn't left with that entire burden god forbid something were to happen to you because I've seen it all sir, nobody has a crystal ball we don't know what the future holds. Does that make sense? . Proceed to script "so what we'll do…"

2. **"I need to talk to my wife about this!"(READ THIS SUPER SLOW)**

Got you sir or ma'am, ofc you need to talk to your wife. She is the beneficiary and we don't want to keep it a secret from her. Just so I have the proper information pulled up for the next time that we do speak, When you do talk to her is it just about which option to go with, or whether to get the coverage at all?

Whether to get the coverage at all or they say both: got it, Correct me if I'm wrong sir, you did say that it would be tough on her to cover that expense by herself correct? Got it, and correct me if I'm wrong sir, you did say you didn't want to leave her with that to have to tap into the savings, or take out a credit card loan for the expense correct? Got it, so it really sounds like it's just more so about which option to go with, correct? Got it, so …(if which option)

IF WHICH OPTION

Do you mind if I make a professional recommendation since it is about which option to go with? What most veterans do in this situation, is they start with the lowest of the 3 options as a comfortable starting point, so we can accomplish 3 things here. 1. We lock in today's rate while you still are as young and as healthy as you are gonna be, that way god forbid you pick up a few prescriptions in the near future, or you have a health issue occur, your rate will be protected 2. We can secure the approval of the coverage and

you'll be sent the policy in the mail in about 7-12 business days which you can then have something tangible in your hand to look over with your wife, and make the educated decision on whether you should keep the coverage at the minimum or increase it to a higher package over the next few months for the rate that you locked it in at today. And 3rd. At least you'll have SOMETHING in place in the short term, that way (BENEFICIARY) won't be left with that entire burden, because nobody has a crystal ball sir, tomorrows never promised, so it brings extra peace of mind… does that make sense? Perfect.. So what well do is…we will start with the bronze option (proceed to script)

IF YOU STILL GET PUSH BACK: correct me if im wrong sir, you are the one ULTIMATELY paying for this correct? Got it, and you're getting the coverage FOR your wife to cover your funeral expenses correct? Got it, and at the end of the day sir, you're not going to get anything less than (bronze option) correct? Got it, well thats all were doing here sir, starting with the minimum you know you'll get so we can lock in the rate while you still are as young and healthy as you'll be, that way we avoid any unpleasant surprises, and get that policy shipped out to you to look it over with your wife in 7-10 business days, does that make sense sir?

PUSHBACK AGAIN: Sir, if I may ask, if your wife tells you no honey i dont want you to get the coverage to cover the funeral expense, are you telling me you're not going to do it?

START APPLICATION: *READ THIS SUPER SLOW & INTENTIONAL*

***Perfect*,** now we'll send in a request for coverage and hope to get the approval. Keep in mind they don't approve everyone but I will do my best to get you the coverage ok. I'll be confirming basic information, asking you some similar medical questions that I know the answers to already.. but i'm just required to ask you for the carrier record by law, then we will be listing the beneficiary, choosing the effective date, and the method of payment. Does that make sense?

Are you familiar with HIPPA laws? They just make me go over this. Everything said and done on this phone call is kept completely secure and confidential, just like a doctor or a lawyer relationship. Can I get a firm "YES" that I did go over this with you?

First page of application:

1. Confirm spelling first/last name
2. Height/weight
3. Phone number on file
4. Email on file
5. Mailing address (house or apartment?!) where would you like the policy to be shipped to at the end of this?
6. State you were born in?
7. Obviously, you are a US Citzen! *(Jokingly, laugh and say i was answering that one for you)*
8. For the medical information bureau, where they verify your health status, go ahead and confirm your **social** for me:

Social Security Objection:

Push Back #1: I completely understand sir, now the only reason they ask for that is that's how they verify your health status, all the prescriptions and health records ARE tied to your social, and **MOST** importantly that's the ONLY thing on your death certificate when you die for them to pay out your loved ones. So go ahead with your social please….

Push Back #2: *I completely understand, no worries we can do this. Go ahead and confirm the first 5 of your social and I can validate the full social for you, we do have the last 4 on file here, it's just for your security.* **GO ahead with your social when you're ready.**

********TEXT Picture of Application********

No worries, do you receive text messages to this phone? I can show you better than I can tell you for better transparency.. (send pic of app). Do you see the carrier name and your name? Does that all make sense now? Perfect, verify your social when you are ready.

Post Social (BREAK The ICE)

Perfect… Now what they are gonna do is just validate your identity and make sure that it does align with the military record on file and that you're not a crazy robot or anything… *chuckle* Obviously you're not, we are on the phone right now!

HEALTH: Filler Questions (5 mins)

Perfect, so the next part of the application, I have to ask you a few more medical questions. I know we already know all of this and we already went over most of these but they just make me ask for the carrier record by law.

1. Do you use anything to help you walk around the house? Such as a cane, wheelchair, scooter?
2. Any oxygen equipment to help you breathe?
3. Any help with daily activities? Like eating, bathing, toileting or dressing?
4. Any COVID-19 in the last 90 days?
5. Any alcohol or drug abuse in your past?
6. Any Alzheimers or Dementia?
7. Any Aids or HIV?
8. Any hepatitis?
9. Any Brain tumor or brain aneurysm?
10. Lastly, do you plan on doing any dangerous activities like jumping out of any aircrafts or fleeing the country? Most veterans tell me they did enough of that in the service

Beneficiary: Build The Emotion (5 mins)

1. Confirm beneficiary from earlier..
2. Confirm spelling of name, relationship, and DOB
3. Confirm the % of death benefit they will receive.
4. If spouse ask if they want to put a “back up” or “contingent” beneficiary

SPOUSE- ***How long have you been married for? Any tips for me? Any grandkids?***
CHILD- ***Awesome, do you see them often? What do you all like to do when you spend time? Any grandkids for you?***

RECAP THE SITUATION: ***Got it sir, so just to make sure we have it exactly the way that you want it, god forbid anything happens to you after the effective date: (beneficiary) will receive 100% of the death benefit? (Bring up the why one last time)***

➡️***PAYMENT Word Track:***

Choose effective date:
The next step here is picking a day that you do want to start your policy. Most families like for it to go into effect immediately since it's day one coverage.. Does that work for you?

IF IMMEDIATELY: Okay perfect, that will mean they typically draft that first premium anywhere from 24-48 hours from now, will that work for you?

IF NO/broke: Okay no problem, this carrier does allow you to choose when you start the policy, what day works best for you?
Okay, so that means they won't draw that first premium until ___ and that also means you won't have any active coverage until then, so you'll have to stay healthy for me!! *(haha)*

*****Google that bank/states routing #** Example "Wells Fargo Routing Number PA"***

1. Perfect, and it looks like we are partnered with *(**with the financial institution they told you during the discount questions**)?* Just to confirm you opened that in (state)?
2. It looks like we are partnered with them in our state system. 9/10 times the routing number that automates is correct. I just have to read this out to you to confirm it. The one I have starts with *(read the first 3 numbers)* ***Go ahead and grab a checkbook or pull up your mobile banking, just let me know whenever it's in front of you and ill read the full numbers***
3. *Read it off to them*. And the account #? Make them repeat it twice. And is this a checking or saving account? Perfect, give me one moment while the system verifies that information is linked to your name. For your safety and the safety of others.
4. **And is your name exactly as it appears with the financial institution? perfect because they are sticklers about it just want to make sure.**

No Checkbook:
Question 1- Do you get your statements via mail or email?
Question 2- Do you do online banking?
****IF THEY DON'T HAVE CHECKBOOK OR FIND BANK STATEMENT OR FIND ACCT #"**
CHECKMATE!!:

"***No worries***, we can just add the debit card on file for now and update it later. Go ahead with the card you want to put on file.

(Ask if Visa or mastercard, write down card number, ask for expiration month/yr, and 3 digit CVV on back). ***MAKE THEM REPEAT IT TWICE***. **THEN PIVOT TO AIG SIWL. WRITE DOWN ALL INFO AND PROCEED WITH APP.**

Bank Objections:

Push Back #1: I completely understand, now quick question (Client's Name): have you ever given or received a check from anyone in your lifetime? Perfect, if you notice at the bottom of every check you'll see the bank's routing and account number For example: I pay my gardener every weekend with a check, my gardener has my routing and account number. The only thing I can do with that information sir is deposit money into your account, and I promise you i'm not that nice ok *chuckle* now go ahead and confirm the account number…
Push back #2: **Why do I have to give you that banking information now?**
I completely understand, so the state is required by law to validate that information provided is linked to your name for your safety and the safety of others. Do you receive text messages to this phone? I'm gonna send you a picture of my screen for further transparency.
Send a pic of the application with carrier name and their name
Do you see your name there? And the name of the carrier on the screen? Now when you are ready with that information.

✅ FINAL TOUCHDOWN

✅ Quick Recap — Just to Lock Everything In:

Alright, before we close everything out, just a quick recap to make sure everything looks correct on your end — think of this as a quick survey. Go ahead and write this down as we go.

1️⃣ Which carrier did we get you pre-approved with today?
2️⃣ What type of policy did we apply for?
3️⃣ How much coverage did we submit you for?
4️⃣ What's the estimated monthly premium?
5️⃣ What's the expected effective date once we're finalized?
6️⃣ And most important… Who's your favorite insurance agent?
Every vet I work with gets a unique code word. Let's use your MOS. Before you discuss ANY policy details, always verify 3 things:

1. My name:
2. My NPN: (I give this every call)
3. Your code word: (ex: "11BRAVO")

If they can’t confirm all three, hang up — it’s a scam.

⁂ Now the Pre-Approval Closing:

Perfect! So here’s what happens next — we’ve been officially pre-approved. ⁂ The carrier just needs to run one more round of underwriting to finalize everything. You’ll get a definite answer within 24–48 hours — sometimes even quicker, like within a few hours. Just make sure to save my name and number in your phone and stay on the lookout for my call or text/email. That way, we don’t miss each other when it’s time to wrap things up. Do you have any other questions, concerns, anything that didn't make sense, or anything you like me to clarify for you? Appreciate you for trusting me with this and allowing me to serve you and your family—talk soon and God bless! ⁂

RING BELL - MARK SOLD YOU JUST CLOSED

MFER!! Text to client afterwards:

Hey (**Client Name**),
It was my pleasure to help you and your family out today. Save this number as my personal cell number. Please let me know once you receive your policy in the mail and make sure to write my name and number on the front of it.
